

THE LATEST ADVANCES IN Diabetes Management

October 25, 2013

Corbin Technology &
Community Activities Center
Corbin, Kentucky 40701

This program is a collaborative effort of
Southern Kentucky Area Health Education Center
Baptist Health Corbin
Cumberland Valley District Health Department

Focus

This program will present the latest advances and recommendations in management of diabetes through recognizing the risk factors for developing diabetes, reducing cardiovascular risk factors, pediatric considerations, nutrition management, pharmacological agents used in diabetes care, with an emphasis on healthy lifestyle choices including physical activity.

Objectives

At the end of this conference participants will be able to:

- Describe latest guidelines for the identification of population at risk for diabetes.
- Recognize the importance of reducing cardiovascular risk factors in diabetes
- Recognize and discuss the use of insulin
- Describe recent developments with insulin and oral drugs in the pharmacological management of diabetes and related disorders
- Describe common issues related to Type 1 & 2 diabetes in children
- Identify American Diabetes Association (ADA) standard of practice and Complementary Alternative Medicine (CAM) related to nutritional management of diabetes
- Discuss the scope and depth of the problem of health literacy and some key ways to address the problem

Target Audience

Physicians, Pharmacists, Physician Assistants, Dentistry, Dietitian, Respiratory, Nurses, and Nurse Practitioners
